Mr. Lawrence,

I checked our EPA database and see that the permit for the Lawson well was terminated. You would need to apply for a new EPA permit for a Class II injection well before you can convert the well for injection. The following are links to the EPA application and guidance to assist you in this effort.

<https://www.epa.gov/uic/epa-region-5-example-underground-injection-control-permit-application-documents>

[https://www.epa.gov/sites/production/files/2016-01/documents/7520-6\\_0\\_508c\\_1.pdf](https://www.epa.gov/sites/production/files/2016-01/documents/7520-6_0_508c_1.pdf)

[https://www.epa.gov/sites/production/files/2016-01/documents/7520-14\\_508c.pdf](https://www.epa.gov/sites/production/files/2016-01/documents/7520-14_508c.pdf)

Subject: Columbus Oil and Gas

Ray,

We are looking at returning a well that was previously permitted as a Class 2 injector. It was one of 5 wells that we originally permitted on our Calvin 1 field and converted to production in 2014. It is no longer bonded through the EPA. Can you please give us some guidance on most efficient way to re-permit this well . It is the Lawson 1-28. One of five wells originally permitted by the EPA. Thanks for your help,

Charlie Lawrence
